- PCM

WORK EXPERIENCE

Django Web Developer Looseleaf

10/2020 - 05/2021

Looseleaf is a startup organization that aims to create an online Learning Management System targeted towards schools and their students.

Achievements/Tasks

- Coded a custom user, model view controller backend
- Created a custom user authentication logic
- Coded back-end logic for admin page with CRUD operations
- Managed forms and database interactions through PostgreSQL
- Handled various exceptions and error handling
- Developed an API to automate account creation which saved a lot of time for testing

PERSONAL PROJECTS

Axcessor (03/2021 - 05/2021)

- Created a responsive Windows application with UI, which lets the user search for executable files and do web searches directly from the application. The application keeps running in the background and pops up when a hotkey is pressed on the keyboard for faster access. Made entirely using Python, Tkinter, Winreg API.

Image Reel (04/2021 - 04/2021)

- Build a platform to share images anonymously on the website. Created the entire back-end user authentication/creation and image storage through Java JDBC, Servlet, JSP, and SQL.

Sparks Foundation (05/2021 - 06/2021)

- Designed and created a webpage using HTML/CSS
- Implemented a payment gateway integration through Razorpay

Personal Portfolio (05/2021 - 06/2021)

- Made my portfolio website with unique animations and layout using JavaScript, CSS and HTML to display all my current projects and works. Prototyping and planning done on Figma.
